Let Somebody Know

Diana Ross

Love we all hope to find
It'll come so easy or can take its time
But I've never given up along the way
One day you're gonna raise your blinds
And every little dew drop is a treasured findWhen you say the things you have to say
Wake up and the day is dawning
It's another chance to change your mind
Reaching for the stars around you, I found youLet somebody know what you really love
Show somebody just what you're made of
Always in a rush, don't you see the sign?
You can always take the timeJust when you think you got it done
In just a moment it can turn around
When you're wishing for yesterday
Wake up and the day is dawning
It's another chance to change your mind
Reaching for the stars around you, I found youLet somebody know what you really love
Show somebody just what you're made of
Always in a rush, don't you see the sign?
You can always take the timeTo let somebody know that you really care
Let somebody see what you have to share
It's a simple thing to let somebody knowAlways in a rush, don't you see the sign?
You can always take the time
Let somebody feel the tears that you cry
Let them know the love is still alive, ohh alive
It's a simple thingTo let somebody know, somebody
Let somebody know, somebody
Let somebody know, oh yea
Somebody babyLet somebody know, oh yea
You gotta let somebody know, somebody
Let somebody know, ohh yea
Let somebody know, somebody
