

# California

## Rogue Wave

Screw California  
And friends that are never there  
And places that they oughta  
Pretend that they even careFrom a false family, she could light you up  
Like a holiday tree in the summerSo lead us thereSo screw California  
And ice that will never melt  
From hearts of the modern  
Children of CiceroFrom a false family, she could light you up  
Like a holiday tree in the summerSo lead us there

Songwriters
