All veils and misty
Streets of blue
Almond looks
That chill divineSome silken moment
Goes on forever
And we're leavin'
Broken hearts behindMystify
(Mystify me)
Sing it
(Mystify)
Yea
(Mystify me)I need perfection
Some twisted selection
Well that tangles me
To keep me aliveIn all that exists
But none has your beauty
But I see your face
I will surviveMystify
Mystify me
Yea
Mystify
Mystify meEternally wild with the power
To make every moment come alive
All those stars that shine above you
Will kiss you every nightAll veils and misty

That chill divineSome silken moment
Goes on forever
And we're leavin'
Yea, we're leavin'
Broken hearts behindMystify
Mystify me
