

# Evergreen

## Switchfoot

Me and the trees, losing our leaves  
Falling like blood on the cross  
I want to be evergreen Everything dies, I know last night  
Part of me wasn't around  
I want to be evergreen  
Yeah, evergreen Waiting, and listening, hoping and missing  
All of our time left alone, I'm the one cutting the rope  
Frostbite in winter, 'cause like a splinter  
You come and follow me down  
I'm the one cutting the rope, yeah Holiday end, I'm here once again  
And I'm left alone on the bus with my  
Head on the ground, in hopes  
That I'm found by you this time around The sun will rise soon and tackle the moon  
Chasing it still in the sky, all that I've got is tonight  
Excuses and reasons and now it is the season  
For all that I never got right, all that I've got is tonight Holiday end, I'm here once again  
And I'm left alone on the bus with my  
Head on the ground, in hopes  
That I'm found by you this time around The night is a crow, saying come hold me  
All that I know is that up and so lonely for thee  
All that I know, all that I know, found myself under your rain  
I want to be evergreen, I want to be evergreen Holiday end, I'm here once again  
And I'm left alone on the bus with my  
Head on the ground, in hopes  
That I'm found by you this time around I want to be evergreen, I want to live all year round  
I want to be evergreen, I want to live all year round  
I want to be evergreen, I want to live all year round  
I want to be evergreen, I want to live all year round
