Spinning Away

Brian Eno & Jah Wobble

Up on a hill, as the day dissolves
With my pencil turning moments into life
One by one, all the stars appear
As the great winds of the planet spiral inSpinning away, like the night sky
In the million insect storm the constellations form
On a hill, under a raven sky
I have no idea exactly where I've beenSome kind of change
Some kind of spinning away
With every single line
Moving further out in timeSpinning away, like the night sky
(Some kind of spinning away)
I have no idea exactly where I've beenAnd it's here and there
And here and there
Some kind of spinning awayAnd here and there
Some kind of spinning away
And here and thereAnd here and there
Some kind of spinning away
And here and thereAnd here and there
And here and there
