

Once (feat. Freddie Wadling)

[Sophie Zelmani](#)

Hey you
Can I breathe
If my chest is coveredHey you
Is my face making sense
Eyes can't be still
In a moment so tenseHere babe
Are the notes you must play
This babe, is the procedureHere babe
Not in another way
I can assure you
That you will be OKOnce would do
Once could change everything
Once could tell
And help me clear out
Some thingsOnce would make
No difference at all
Once or not
I've already made this fallHey you
Make the most of the time
You've got to cross many bordersIf you can't control your mind
Something will happen
It's just a question of timeOh babe
I can not concentrate
I'm here for the wrong reasonIt's you who makes my knees shake
One season, then
The brakes're gonna break
