

High on Life

Rebelution

Everybody at our spot tonight
Come on, come on, come on, come on vibe with us
Little something at our spot tonight
Come on, come on, come on, come on get hyped with us
Ain't no need to fight
Get up, wake up, get down to this sound
We gonna light the night
Tell me who is high on life Everywhere I seek things, speak to me
Things speak to me, please sing to me
Set up, break down 'til I'm weak
Each week we reach a new peak
And I wonder when it all might stop
Cause until then, I'll give it all I got
In harmony, get back up
You're my remedy, time to do it again Everybody at our spot tonight
Come on, come on, come on, come on vibe with us
Little something at our spot tonight
Come on, come on, come on, come on get hyped with us
Ain't no need to fight
Get up, wake up, get down to this sound
We gonna light the night
Tell me who is high on life Okay, I'm on a mission
I won't quit, I won't be sitting all day
Okay, my ambition
Is straight up traditional always
Awaken, new day
Means get back to basics now
Don't waste it
Can't waste it
Let me tell you 'bout a thing I know
Plant the seed, watch the whole thing grow
It don't matter if you start out slow because
Yeah that's life, it's how the whole thing goes
Spread love, that's the only way, it'll come back around one day
Don't waste it
Can't waste it
