Scientific

Alex Dias

20 million miles away like something coming in
A tidal wave from outer space and it’s so near
Step out of moving up you better stay on guard
One defender disappeared and we want him back
What are the kids going to be like in history?
It’'s all the same fortunate I’'m still around
Science can tell
Got it all wrong
The 18 in 86 it focused in our minds
Wake up take up kill us all I’'m grown
Step on up, moving up you better stay on guard
One defender disappeared and we want him back
What are the kids going to be like in history?
It’'s all the same, fortunate I’'m still around
Science can tell
Got it all wrong
