

# Scientific

Alex Dias

20 million miles away like something coming in  
A tidal wave from outer space and it's so near  
Step out of moving up you better stay on guard  
One defender disappeared and we want him back  
What are the kids going to be like in history?  
It's all the same fortunate I'm still around  
Science can tell  
Got it all wrong  
The 18 in 86 it focused in our minds  
Wake up take up kill us all I'm grown  
Step on up, moving up you better stay on guard  
One defender disappeared and we want him back  
What are the kids going to be like in history?  
It's all the same, fortunate I'm still around  
Science can tell  
Got it all wrong
