Hummingbird

Cheryl Cole

I'm getting dizzy here
Running in circles
Holding onto your coat tailsCupids been busy
Still shooting his arrows
While I follow the love trailThey led me straight to you
And all I had to do
Was look in my tracks and double back
I turn around and look what I foundAll this time I've been running in circles
You were right behind
I guess I could've met you in the middle
How come it never crossed my mind?Humming birds around my head
Humming birds around my head
I ran into your arms
Wound up dizzy insteadNow I got butterflies, blue jays
Pretty things in the air out there
Ever since I found there's been
Humming birds around my headHe's so tricky, yeah
Coming full circle
I always knew how to get thereAnd he was so picky that
He took his eye off the sparrow
Flew out after the nightingaleAnd had fun for a while
He took them fast and lost his style
Circled his tracks, double back
Turned around and look what you foundAll this time I've been running in circles
You were right behind
I guess I could've met you in the middle
How come it never crossed my mind?Humming birds around my head
Humming birds around my head
I ran into your arms
Wound up dizzy insteadNow I got butterflies, blue jays
Pretty things in the air out there
Ever since I found there's been
Humming birds around my headI got tiny little bee stings on my heart
Where the love blooms
Honey, can I only be with you?Sitting underneath the shade tree
In the park where I first met you
Funny how the light can change your view, ohHumming birds around my head
Humming birds around my head
I ran into your arms

Wound up dizzy insteadNow I got butterflies, blue jays
Pretty things in the air out there
Ever since I found there's been
Humming birds around my headHumming birds, humming birds
I ran into your arms
So dizzy insteadButterflies, blue jays
Oh, in the air out there
Ever since I felt there's been
Humming birds around my head
