

Approaching Lightspeed

Wolfsheim

I try to breathe, I try to think of you
Don't know if trying will do
The silence a mirror
That breaks the light in two
The silence a mirror
That breaks the light in two
Come to me and with violence
We'll discover what will make us free
Accelerate, we'll try to stand
Where no one [Incomprehensible] to be
We're climbing high, we'll fly away
We're fearless indeed
When time stands still, a moment lasts
Approaching lightspeed
Approaching lightspeed
Approaching lightspeed
We're climbing high, we'll fly away
We're fearless indeed
When time stands still, a moment lasts
Approaching lightspeed
We're fearless indeed
(Approaching lightspeed)
We're climbing high, we'll fly away
We're here to move, we move to stay
When time stands still a moment lasts
We're moving on, we're flying fast
We're climbing high, we'll fly away
We're here to move, we move to stay
(We're fearless indeed)
When time stands still a moment lasts
We're moving on, we're flying fast
(Approaching lightspeed)
We're climbing high, we'll fly away
We're here to move, we move to stay
(We're fearless indeed)
When time stands still a moment lasts
We're moving on, we're flying fast
(Approaching lightspeed)
We're climbing high, we'll fly away
We're here to move, we move to stay
(We're fearless indeed)
