Very Best Friend

Hot Rod Circuit

So he says did you know IM your very best friend, I cant repeat this over, eye rings on the pillow, some think I might never really had the time, I thought you were my hero, never say that well be alive again.the worst task coming and it will never get better
run you down
the worst task coming and it will never get better
said you in that way
the worst task coming and it will never get better
run you down
the worst task coming and it will never get betterSo he says did you know IM your very best friend, I cant repeat this over, eye rings on the pillow, some think I might never really had the time, I thought you were my hero, never say that well be alive again.the worst task coming and it will never get better
the worst task coming and it will never get better
the worst task coming and it will never get better
run you down
the worst task coming and it will never get better
said you in that way
the worst task coming and it will never get better
run you down
the worst task coming and it will never get better
