

International Space Station II

Figurine

Do you remember the day we left the Earth?
I thought it was for good
It's been two years since then I think
At the time we thought we should But I miss the blues, I'll miss the greens
I liked humans more than machines
Our families are so far away
As we floated around in space But even though we miss our friends
The love we share will never end
International space station
Join your arms across our nations The time has come to return to Earth
But we must back our things first
Don't cry, we'll be back soon
From up so high beyond the moon
