Chemical Smile

Everclear

She lost her focus yesterday
She lost her focus in the sun
Sit and stares at it for hoursShe said she likes to go outside
She gets hung up on the wind
She gets lost inside the happy noiseSometimes I don't understand her
Sometimes I don't want to understand herShe says, "No, no, no, no, no"
She don't want no double life
She says, "I should know why"She seems happier at night
Her color TV and her chemical smile
I don't wanna know the reason
I don't wanna know the reason
I don't wanna know the reason, whyShe say, she say
She say, she say
She say, "Jesus owes her money"
She say, she say
She say, she say
She say, "The angels are her friends"
What the hell does that mean?Go
She's got the chemical smile
Yeah she's got the chemical smile
Yeah she's got the chemical smile
Baby got the chemical smileShe say
She say
She say
...
