

# Need You

## One Step Away

Staring out the window,  
Watching the faces pass me by  
But where are your green eyes?  
You haven't been around in a while  
It's been ages since I've seen your smile.  
Its all flipped around, which way is up and down?  
Where are you now? I wish that when I looked up at the bright blue sky  
That I could be as happy as the birds flying by  
I need you,  
You need me too  
I need somebody to catch me when I fall  
Someone to hold me when I call  
And after all we've been through  
I need you I tried to forget the world,  
but it's so hard when the world is you  
I need your help  
But you said that we're through  
No more cars to be chased,  
No more flying in space,  
Just days, days put to waste  
I feel you lying next to me  
I open my eyes but I can't see  
It was all just a dream  
Even with all I say  
You still push me away  
I want you to stay  
Just stay I need you  
You need me too
