Salvation

Scanners

Went to the sea but the tide was out
Stood on the shore, but the wind was cold
Waited around till no ones' about
Thought of my spirit till my head took holdLooked in my heart but my heart was empty
Looked to the ground but the road was long
But now I've found my new salvation
It's so new the old one's youngI've been waiting for the dark to come
My temptation and salvation
I've been waiting for the tide to turnDark eyes become divine
I need the love I crave
Your hands they burn like mine
I'll take you to my graveDark eyes become divine
I need the love I crave
Your hands they burn like mine
I'll take you to my graveI've been waiting for the dark to come
My temptation and salvation
I've been waiting for the tide to turnDark eyes become divine
I need the love I crave
Your hands they burn like mine
I'll take you to my grave
