

Hey, What You Trying To Say

Embrace

Hey, what you trying to say
Because the giants that I've left behind
 Won't overshadow me
 So hey, what you trying to mend
 When the magic of the first is feeling
 Like it could never end
 And stars remind you
 You see the best in the dark
 And every time I see your eyes
 You can't deny it cause they say
What you're trying to say
So hey, what you trying to lose
 What you can't describe you try to hide
 No one ever tells the truth
 So hey, what you trying to say
 Do you ask you if you need me
 As you say it's all okay
 Stars remind you
 You see the best in the dark
 And every time I see your eyes
 You can't hide
 Cause I know how you feel
 And every time you use that mouth
 Everything I hear will always let me down
 Cause all I hear is words
 Every time you make a sound
 Promises and worse
You'll always let me down
Hey, what you trying to say
 Because the giants that I've left behind
 Won't overshadow me
 Hey, what you trying to mend
 When the magic of the first time is the feeling
 All these feelings never end
