

# Flutes

## Hot Chip

I know it's nothing more then flutes  
But something in my heart is loose  
There's never been a better dayAnd if there is nothing more  
Then nothing more will add us say  
There's never been a better dayWork that inside outside  
Work that more  
Work that right side left side  
More that more  
Inside outside left side work the floor  
Inside outside up top down with more  
Work that inside outside  
Work that more  
Work that right side left side more that more  
Inside outside left side work the floor  
Inside outside up top down with moreI put up on a string today  
Deciding never taught me a thing  
A wooden box breathes the wayNever again  
Never again  
Never again  
Never againAll this talk is getting me down  
Nothing's making sense in my brain  
I'm moving words in coarse of today  
Trying hard to fix through the pain  
I'm waiting to the thought that we came  
Only to discover I'm aged  
And blow a quart of love in your fameAnd watch things drop down  
And watch things drop down  
And watch things drop down  
And watch things drop downAll this talk is getting me down  
Nothing's making sense in my brain  
I'm moving words in coarse of today  
Trying hard to fix through the pain  
I'm waiting to the thought that we came  
Only to discover I'm aged  
And blow a quart of love in your fameAnd watch things drop down  
And watch things drop down  
And watch things drop down  
And watch things drop downOne day you might realize  
That you might need to open your eyes

One day you might realize  
That you might need to open your eyes  
Work that inside outside  
Work that more  
Work that right side left side  
More that more  
Inside outside left side work the floor  
Inside outside up top down with more  
Work that inside outside  
Work that more  
Work that right side left side more that more  
Inside outside left side work the floor  
Inside outside up top down with more  
One day you might realize  
That you might need to open your eyes  
One day you might realize  
That you might need to open your eyes
