

# Feel What I Feel

## Norma Jean Bell

Why can't you smile, shake a hand  
Joke around when you're under?  
Doesn't take that much to do it  
Sing a song when you're down  
?Cause I know that you wonder  
    What is coming over me  
Don't you keep it in, gotta let it out  
    Swing your head around  
    Tell ?em what you're all about  
    Just believe it and get with it  
    And when you hear the sound  
Don't you know that I was made for this music?  
    When I hear it, take a ride and I lose it  
        All my worries step aside  
        When I hear a simple melody  
    Let me in like the wind, let me take it higher  
        Make you feel what I feel  
    I'll be that song that you play over and over  
        Make you feel what I feel  
        Can you feel me?  
        Can you feel me?  
        Can you feel me?  
    See I don't mind, I don?t hide  
        Because, ?cause I'm open  
        What I gotta do to prove it?  
        Walk a mile in my shoes  
        Will you dare take a journey?  
    With me is where you wanna be  
    Don't you keep it in, gotta let it out  
        Swing your head around  
        Tell ?em what you're all about  
        Just believe it and get with it  
        And when you hear the sound  
Don't you know that I was made for this music?  
    When I hear it, take a ride and I lose it  
        All my worries step aside  
        When I hear a simple melody  
    Let me in like the wind, let me take it higher  
        Make you feel what I feel

I'll be that song that you play over and over  
    Make you feel what I feel  
        Can you feel me?  
        Can you feel me?  
        Can you feel me?  
    Don't you know that I was made for this music?  
        When I hear it, take a ride and I lose it  
            All my worries step aside  
                When I hear a simple melody  
            Let me in like the wind, let me take it higher  
                Make you feel what I feel  
    I'll be that song that you play over and over  
        Make you feel what I feel  
    Don't you know that I was made for this music?  
        When I hear it, take a ride and I lose it  
            All my worries step aside  
                When I hear a simple melody  
            Let me in like the wind, let me take it higher  
                Make you feel what I feel  
    I'll be that song that you play over and over  
        Make you feel what I feel  
            Can you feel me?  
            Can you feel me?
