

# Parabellum

## Vader

Fear, decay and chaos  
Still plundering the globe  
All hate now mixed with hope  
Aggression uncontrolled Cities burning bright around  
And panic reached the heavens  
Prayers and believers  
Now screaming for deliverance Freedom blinds in pain  
Turning love to hate  
Transmuting wine to blood  
In apocalyptic heat Killing never stops  
Killing is in us  
Killing never helps  
Not to forget no more regret Lead: Spider/Peter Hate leads to hate  
Perpetual revenge  
So atavistic lust  
Poisons our sanity Hypnotized dead flesh  
Dancing closer to the flame  
Like a moth in last attempt  
Of running fast into the light  
All consumed by the furnace hate  
And searching for the enemy  
If you wanna live in peace  
Stay ready for the war Is killing gonna stop?!  
Is killing gonna ever stop  
To save us all?!
