

Fading West

Switchfoot

Fading west with you!
Fading west with you!The sun goes down for the summer,
middle sky full of water
I am fading westward too
fading west with you.Life won't sing like I want it
the traffic blows modern sonnet
the traffic hums a dirty tune
fading west with you.I'm headed back to the west coast where I'm from
I'm headed back to the west coast where I belong,
California's calling me back home.
Fading west with you!Keep my mind over matter
'cause I've seen my hopes shattered
they told me lies I thought were true
fading west with youThe sun goes down
we were already goneHeaded back to the west coast where I'm from
I'm headed back to the west coast where I belong
California's calling me back homeFading west with you!When I'm out alone
feel like I'm caving in
when you leave me alone,
I start to wonder, where have I been?(Chorus)Headed back to the west coast where I'm from
headed back to the west coast where I belong
California's calling me back home
California water won't bring me homeFading west with you
fading west with you
fading west with you...
