

5ive Gears In Reverse

Elvis Costello

Five gears in reverse
For girls looking at the big lift
Somebody send out for the night nurse
Please don` t stick me on the late shift
If you don` t know by now
Nobody`s gonna tell you
If you don` t know by now
The shock will probably kill you But if your patience is corrupted and you still cannot decide
You`re sitting in the garage contemplating suicide
And you have no motivation you can` t even catch your breath
All of this acceleration is driving you to death Five gears in reverse
You think I don` t know what I` m doing
Another fashionable first
Like walking down the road to ruin
But if you`re safe and sound
Don` t let me interrupt you
And if you`re gagged and bound
Well how can I corrupt you
