

Ekg

Wilco

Come on listen to the wheel this way
I belong to the stars in the day
I ran away
Eternal Instigator
Well I was old
I remember the milky way why
I belong to the stars in the sky
Random name
Random name generator
Random name generator
Random name generator
Here lonely in the coldest night
Somebody hold me in the diamond light
A narrator
Mr. Narrator
I want a name and a newborn child
A miracle only ever grows wild
It is a book instagator
A random name generator
I kinda like it when I make you cry
A miracle only once in a while
A random name
Random name generator
I change my name every once in a while
A miracle every once in a while
I create
I am a flame
A flame creator
A random name generator
Come on cuff me to the weed with some wine
If I miss your breeze or you miss mine
I kinda like it when I make you cry
A miracle every once in a while
Come on cuff me to the weed with some wine
I think I miss my family I found
