

# Here She Comes

Kurt Nilsen

Have you ever met my friend?  
Her name is June  
She's a solid piece of workBrought up in a shitty little town  
Which stays unknown  
Still she misses homeShe's done it well on her ownHere she comes  
She won't be brushed aside - oh, no  
Here she comes  
You'll know it's her  
Here she comes  
Here she comesWhile you've been sleepin' she been up  
Since I don't know when  
Never waste her timeOnce she sets herself a goal  
She switches mode  
You'd better be on her sideYou'd better be carefulHere she comes  
She won't be brushed aside - oh, no  
Here she comes  
You'll know it's her  
You'll know for sure  
Here she comesAnd her voices lead her on  
Embrace the shadows, enjoy the sun  
She's bright  
She's the oneHere she comes
