Desperation

Miranda Lambert

Throw a dog a bone, I'll take it if I have to Go real fast like there's somewhere we can get to What's the use of standing right there on the edge If there ain't nowhere to fall What's the use in hanging on tight to the phone If nobody might callDesperation There's danger in frustration Complicated words slipping off of your tongue And ain't one of them the truth I'm still desperate for youTell it like a lie, live it like a movie Give a heart away like it don't mean nothing to me What's the use in making all the plans that we made If you weren't gonna go What's the use of slapping on a smile for a face If your eyes don't wanna showDesperation There's danger in frustration Complicated words slipping off of your tongue And ain't one of them the truth I'm still desperate for youWell, it's too damn bad you didn't have a chance To make me your best friend You were too caught up in giving too much up And not doing what you should have beenDesperation There's danger in frustration Complicated words slipping off of your tongue And ain't one of them the truth I'm still desperate for youDesperation
