

# Meteor Flower

## July For Kings

Meteor flower you settled in my life  
Shine among the cut-out stars and fireflies  
Singing careful songs across a technicolor night  
Signals stronger pass between our silver satellites I think I want to fly away with you  
But for now I'm afraid, I'll hold you close it's  
All I can do. Write our names across the galaxy  
Meteor flower  
I'll hold the stars above your life  
I'll be your sweet or sour  
I could be right there in your perfect stare  
I'll be your every hour  
Write our names across the galaxy  
Meteor flower Meteor flower you settled in my night  
Flashing bright among a field of fireflies  
Dreaming careful dreams that everyone thought wouldn't last  
Spinning spider webs around the dying stars we pass I think I want to fly away with you  
But for now I'm afraid, I'll hold you close it's  
All I can do. Write our names across the galaxy  
Meteor flower  
I'll hold the stars above your life  
I'll be your sweet or sour  
I could be right there in your perfect stare  
I'll be your every hour  
Write our names across the galaxy In your whisper I get lost  
On a stormy sea I'm tossed around 'till nothing else is right  
It was a million miles of empty space  
Before I found a warmer place  
Orbiting a home up in your sky  
Up in your sky Write our names across the galaxy  
Meteor flower  
I'll hold the stars above your life  
I'll be your sweet or sour  
I could be right there in your perfect stare  
I'll be your every hour  
Write our names across the galaxy I could hold the stars above your life  
I'll be your sweet or sour  
We could write our names across the galaxy. Write our names across  
We could write our names across  
We could write our names across the galaxy

Meteor flower

Meteor

Meteor flower

Meteor

Meteor flower

We could write our names across

The galaxy
