American Jesus

The Section Quartet

I don't need to be a global citizen
'Cuz I'm not that nationality
I'm a member of a growing populace
We enforced our popularity
Then it seemed to be a fire burning
And there are things that drag us down
But there's a power and a vital presence
That's lurking all around
We've got the American Jesus
See him on the interstate
We've got the American Jesus
He helped build the president's estate
I feel sorry for the earth's population
'Cuz so few live in the U.S.A
At least the foreigners can copy our morality
They can visit but they cannot stay
Only precious few can garner our prosperity
And it makes us walk with confidence
We've got a place to go when we die
And the architect resides right here
We've got the American Jesus
See him on the interstate
We've got the American Jesus
Overwhelming millions everyday
He's the farmer barren fields
The force the army wields
The expressions in the faces
Of the starving children
The power of the man
The fuel that drives the clan
The vengeance and the motive
Of the murderer
He's the preacher on TV
The false sincerity
The form letters that written by
The big computers
He's the nuclear bombs
And the kids with no moms
And I'm fearful that

He's inside me
We've got the American Jesus
See him on the interstate
We've got the American Jesus
Exercising his authority
We've got the American Jesus
See him on the interstate
We've got the American Jesus
Overwhelming millions everyday, yeah
One nation under God
One nation under God
One nation under God
One nation under God
One nation under God
One nation under God
One nation under God
One nation under God
