

# Near You

## The Wilburn Brothers

I should get out of this seat  
Feel the world beneath my feet  
Strive to see more of the sun  
Try to change what I've become  
Move on up through this down  
Take this luck and turn it around  
I get near you but I never seem to reach you  
I get near you but I never seem to reach you, reach you  
Somewhere tonight the stars still shine  
Somehow I've got to re align  
Fueled by the promise of the sun  
Pulled by the charm this night has spun  
Move on up through this down  
Take this luck and turn it around  
I get near you but I never seem to reach you  
I get near you but I never seem to reach you, reach you  
I get near you but I never seem to reach you  
I get near you but I never seem to reach you, reach you  
Reach you, reach you, reach you
