

# Burn So Bright

Jessie Farrell

If you're waiting for the perfect time  
To try something you've never tried  
Time will pass you by and you won't do it  
Save nothing for a rainy day, you'll blink and it will be too late  
Why not start right now and just get to it?  
Shut up the voice inside your head that says "stay in the shadows" Burn so bright that the dream you have inside  
lights up the night  
Burn so bright that the angels have to cover up their eyes  
Dare to be bold, dare to be great  
Leave a little love all over the place  
It's your life, burn so bright  
Why talk when you can sing out loud?  
Why hide when you can draw a crowd?  
You deserve a future with no limits  
Take baby steps until you're done  
Don't miss out on all the fun  
Put a memory in every minute With every excuse you come up with  
You'll miss a door that opens Burn so bright that the dream you have inside lights up the night  
Burn so bright that the angels have to cover up their eyes  
Dare to be bold, dare to be great  
Leave a little love all over the place  
It's your life, burn so bright Turn up that voice inside your head that says "you're here for a reason"  
Burn so bright that the dream you have inside lights up the night  
Burn so bright that the angels have to cover up their eyes  
Dare to be bold, dare to be great  
Leave a little love all over the place  
It's your life, burn so bright
