Star Signs

Leona Naess

And I still love him tonight
No distance or time can bite
And I still feel out of place
In crowded rooms and the silence of spaceNo love could be this hard to beat
I still read your star signs, star signsAnd they know just when to hit
When morning comes and your friends, they gotta split
And you know just what to say
When no one's around you know how to playNo love could be this hard to beat
I still read your star signs, star signsBaby, baby can't you see
This world ain't big enough for you or me
So light the candles and turn out your lights
And turn on my lightsNo love could be this hard to beat
I still read your star signs, star signsI don't even know what they mean
What you mean
I don't even know what you mean
What you mean
