Sleeps With Angels

Black Lab

She sleeps with angels way up high in the air
She sleeps with angels, she got angels in her hair
And they call her Gabrielle from the way that she sings
Oh lover come you ought to get you some wing
She sleeps with angels up in the sky
Sleeping with angels you can't help but get high
All night
Your bag gets heavy baby lay down your load
Get on your hands and knees and do like you've been told
You ask for more, ask for less
Or you can sleep forever, just sleep forever
With the angels in their long white robes
Sleeping with Jesus Lord, sleeping with Jove
All night, all night, all night, all night
Sleep with the angel well and never look back
Sleep with the angels while the sky turn to black
But you can sleep under ladders on the tracks of a train
But sleeping in the clouds won't keep you out of the rain
All night, all night, all night
