

Be Right Back

Dutch Uncles

You talk about it
Reason of the ground
Such a strongly and sophisticate now
I work hard these days for what you had to have
Just doing bad things, I can't predict all that You said: I know it, I think I know it
You said he knows that is there
Is coming back, is coming back and said
You say you'll be right back but you didn't But you didn't
So I wait you, I see no escalades
Maybe it's a stare case, bring fire rexing
It's what it takes to get there and if you down it could be more expensive
Just take a look around
You can see that you make it
If that's a cold case, a reason of the grind
You say: My dear should love you anyhow
You good people, can you see throw it?
And so you must define, how will you spending with? But you didn't
So I wait you, I see no escalades
Maybe it's a stare case, bring fire rexing
It's what it takes to get there and if you down it could be more expensive
Just take a look around
You can see that you make it That cold key, a strange to be found,
To judge each other, the color and the sound
You good people staying off the grass
But could I beat thou?
Believe in all your chance
You said: I know it, I think I know it
You said he knows that is there
Is coming back, is coming back and said
You say you'll be right back but you didn't
