

# Right Now

David Wilcox

Riding out into the night  
You know why and where to go  
She can't wait to roll you right  
She called you up and told you so  
Feel the wind now as it cleans away your past  
This when you feel your future changing fast  
Right now, right now, right now  
Keep your mind back on the road  
Concentration on the curves  
She made time feel slow  
She cranked the volume on your nerves  
The town is sleeping and the motor's making time  
Take it easy, hold it right at ninety-nine  
Right now, right now  
See the candle in the dawn  
Lover's light is burning still  
Need some sleep to carry on  
Wonder when you ever will  
There beside you she is breathing, slow and sweet  
She is smiling as you slide under the sheet  
Right, right now, right, right now, right, right now
