

Good Love

Jason Castro

Oh, I finally found a silver lining,
the first moment that I knew you were mine
Perfect place, and perfect timing
I can see sunshine on my horizon
It's always finds a way to come up on a Good love, good love
You know when you got it, it's a
Good love, good love
Nothing you would change about it
Bigger than your hands can hold,
but it fits just like a glove when it's a
Good love, good love When the world just isn't fighting fair
And everything we know is up in the air
Baby, I don't even care
'Cause every day with you is an answered prayer
You just can't help but count your blessings in a Good love, good love
You know when you got it, it's a
Good love, good love
Nothing you would change about it
Bigger than your hands can hold,
but it fits just like a glove when it's a
Good love, good love
Good love, good love Just as true as history written
You and me, we are the definition of a
Good love, good love
Good love, good love
Yeah
Bigger than your hands can hold,
but it fits just like a glove when it's a
Good love, good love
Good love, good love Good love, good love
You know when you got it, it's a
Good love, good love
Nothing you would change about it
Bigger than your hands can hold,
but it fits just like a glove when it's a
Good love, good love You know when you got it
It's a good love [x4]
