

Mystery

Brooke Fraser

I wanna get your words stuck in my head
I wanna touch your soul with mine
I want to always be, be by your lead
Always I wanna know that you hung the stars in the sky
So on lonely nights I would know your presence
I wanna feel your love under my skin, down through my bones [Chorus]
Your love endures forever
Your love changes me
Your love makes me whole, makes me better
Your love endures I wanna feel the wind and know that you're near me
And see in the seasons your mystery
I wanna feel your love flow through my veins
Pound through my heart
[Chorus] I want to know how this could be
Yet your love remains a mystery
That's woven all the way
That's woven all the way
That's woven all the way through me [Chorus]
