All I Want

Out Cold

This Judas heart it wears a stain
Now my regrets have found a name
Spare me the stars up in the sky
Cos they don't shine on you and I

You're all I want oh child
You're all I want

The savage night a cheap embrace
A stolen kiss that can't replace
These dreams of you untouched by time
Of sleeping late with legs entwined

You're all I want oh child
You're all I want

And my feet don't move like they moved before
Down that open road ain't no love there anymore
Oh where my true love leads there my heart will follow
I can't find a hideaway with no escape from my
Sorrow

I wonder where you are tonight
And if there's someone by your side
And does he nurse the battle scars
And share the dreams that once were ours

You're all I want oh child
You're all I want

And my feet don't move like they moved before
Down that open road ain't no love there anymore
Oh where my true love leads there my heart will follow
I can't find a hideaway with no escape from my
Sorrow
No escaping my sorrow, my sorrow

You're all I want, all I want
Now my love can't afford to wait
Don't need the moon, don't the stars

Don't need to fall in love again

Don't need the moon, the stars above
You're all I want my love
