

Venom

Hatesphere

In the blood of every lost soul
Runs the venom that turned eternal bliss into a living hell
Its spreading like a virus
One you cannot kill This venomous game is my creation
I made you who you are
There is no cure for this evil
Causing the panic to spread Yeah
Let there be chaos and let it reign
It will make the brave new world
Bite until it bleeds
Malice is the new disease The flesh Ive tasted, the seed Ive sown
The venom eats you from the inside
Youre on your knees begging to be saved
Begging me to put an end to the agony Yeah
Let there be chaos and let it reign
It will make the brave new world
Bite until it bleeds Malice
The venomous kill
Venom
The malevolence of this world
YEAH!
