Talk About Us

Jennifer Lopez

I saw you and fell in love
You saw me and fell in love, too
You and me, we fell in love
With each other last night
I told you that I was concerned
You told me of your concerns, too
Yet and still we both decided
To make love last night
Baby, please tell meWhere do we go from here my love
What are we doing baby
Boy you gotta let me know
Why can't we live the way we want
I want the world to know
I just gotta let it show
What do we stand to lose
If being together
Is what we choose
Oh my love
I think that we should talk
About usCould this be a crazy dream
And if so then you're dreaming too
'Cause I know for sure that
You feel the same as I do
Could it be that we could be wrong
Even though we're feeling so right
I don't care because I know
That I want you tonight
And I know you want me tooWhere do we go from here my love
What are we doing baby
Boy you gotta let me know
Why can't we live the way we want
I want the world to know
I just gotta let it show
What do we stand to lose
If being together
Is what we choose
Oh my love
I think that we should talk
About usYou see all my live I've waited

Waited all my life
Just to be with someone like youWhere do we go from here my love
Where are we going baby
I wanna know
Why can't we live the way we want
I want the world to know
I just gotta let it show
What do we stand to lose
If being together
Is what we choose
Oh my love
I think that we should talk
About us
