

What You Do Best

We Are Scientists

Save yourself
A lot of agonyGo on
Do what
You do bestShake your head
And walk away from meGo on
Do what
You do bestAnd when I said that you were somethin else
I didn't mean it as a complimentSo what
Go onYou run away too easily
And always take it out on meSo what
Go onIf you've been too far
It's gonna hurt a bitGo on
Do what
You do bestAnd you just break my heart
You're gonna murder itGo on
Do what
You do bestAnd when I said that you were somethin else
I didn't mean it as a complimentSo what
Go onYou run away too easily
And always take it out on meSo what
Go onOh kid you gotta set it off
Everything you did is slowly soakin in
It's slowly soakin inI bet you think you're better off
I never shoulda let you get too close to this
What was I supposed to thinkAnd when I said that you were somethin else
I didn't mean it as a complimentSo what
Go onYou run away too easily
And always take it out on meSo what
Go onSo what
Go on
