Lemoneyez

Bottlefly

I'm a rocket, I'm a dirty angel
I can liberate your mind
Like a comet flying high above you
Looking down on your disguiseWhen all of the people laugh, what would you say?
Laughing in lemoneyez, blowing your mind away
You were the only one cloud in the sky
Flying in loneliness, kissing the world goodbye
Living a single lifeDo you hear me, can you see right through me?
I'm the prophet in your eyes
Isolation on the path you've chosen
Don't forget where I belongWhen all of the people laugh, what would you say?
Laughing in lemoneyez, blowing your mind away
You were the only one cloud in the sky
Flying in loneliness, kissing the world goodbye
Living a single lifeAnd in the sun there was a
Bright reflection of the colors
I love the ones I see, like rivers in the rain
You were the only one to suffer, you're falling out on meWhen all of the people laugh what would you say?
Laughing in lemoneyez, blowing your mind away
You were the only one cloud in the sky
Flying in loneliness, kissing the world goodbye
Living a single life, living a single life, living a single life
