

Vampire Sun

Cathedral

Skull of God with the devil's eyes
Crowned in fire sodden sky
Beaming rays of genocide
Into virtues magic lie Illusive myth of light enslaves you
Vampire sun it drains you Beg the sword for liberty
Fall before the king of flies
Delirium is flowing free
In our obedience disease The gift of life is reaped of value
Vampire sun it drains you Gaze into the face of fire
Dreams descend into the pyre Monolithic angel
Unveil your king to this planet disabled
Mummify the cosmos
With the vision of divinity yeah! Electric vulture flying high
Through the universal eye
To cleanse the heavens with earth soul
The excretion of mankind Feeding from the fangs of virtue
Vampire sun it drains you Gaze into the face of fire
Dreams descent into the pyre
