So Far So Good

Sloan

I speak to those who have accepted their fate
Their spirits high, though no chariot awaits
People are down on this world but we only have one
Isn't that better than none?Don't be surprised when we elect another liar
Did you learn nothing from five seasons of The Wire?
When it comes down to it, everybody meant well
Before their lives went to hellOh, what does it matter?
I'll see your best intentions and I'll raise a generationSo far so good, I'm siding with your mother
So far so good, be gentle with your brother
Be good to one another and you'll realize while looking into their eyesConsider this on your luxurious wait
Will you find out in time, or will it be too late?
Better get on with it, you know who I'm talking to
Changing this world's up to youLife in the universe seems exceedingly rare so,
Be advised to take care
