

Goodbye Friend (feat. The Script)

David Guetta

The colours will change
I love every shade of you
Don't lose your faith
Keep walking how you do

Don't you say it wasn't worth
All the pain and all the hurt you're going through
And I'll always be with you

Goodbye, friend
No, this is not the end
Lift up your head
Somewhere we'll meet again

Hold on to the moments we shared
Those are the treasures that won't disappear
Goodbye, friend, friend, friend, friend, friend

The world's just a place
That we're only passing through
Heaven awaits
Those that keep marching through

Don't you say that loving lost
Wasn't worth the pain it cost you're going through
'Cause I'd take it all for you

Goodbye, friend
No, this is not the end
Lift up your head
Somewhere we'll meet again

Hold on to the moments we shared
Those are the treasures that won't disappear
Goodbye, friend, friend, friend, friend, friend
