

Kill the Time (feat. Fiora)

Tensnake

Take your time

Take your time

We'll kill the time

We'll kill the time

It'll be alright, with the changes you've made

You can feel the fire with your own hands if you fan the flames

With the turning tides, keep it hidden so deep

With empty calls on the airwaves, tripping over your feet

We can kill the time

Ride up to the light, I could steal it away

When the guessing came in like a hazard

but is a haze

Keeping out of reach with a dangerous night

For every version of this commotion

You could brighten my eyes

You could brighten my eyes

We can kill the time

For every version of this commotion

For every version of this commotion

For every night you saved your devotion

We can kill the time
