

The Law

Uriah Heep

To build a better world you gotta
tear the old one down
To free us from this emptiness
Hell-bent and heaven bound The pleasures of a normal life
Turn into decay
We're no good in time
When we are falling out of faith You gotta take the law into your own hands
You gotta make the law into your own plans
You gotta take the law into your own hands
You gotta make the law into your own plans You gotta make a self sacrifice
When you hear the sirens calling
You can take it anyway
Try and see it as a warning Part the sea with floods of shame
Stepping stones on sinking sand
Everything is there for you
Turn it into wonderland
You gotta take the law into your own hands
You gotta make the law into your own plans You gotta take the law into your own hands
You gotta make the law into your own plans
