Dream Come True

Noah Young

What I'd give to have your hand to hold
Staring in those eyes shining just like gold
Your hands they are so cold
But you don't know how long I've waited
If only she knew that this song was all about her
Is there a song that I could sing to win your heart
There's not a moment where I think I'd ever doubt her
But soon we'll laugh about the days we were apartI'll just write these songs forever and someday we'll be together
But until my dream comes true you got me and I got you. I got youI'm not the type of guy to say how I feel
I've never been too good with words but you make it so real
So in advance I think I will apologize
For being awkward and for acting so shy
If only she knew that this song was all about her
Is there a song that I could sing to make you smile
Because when you grin the whole wide world lights up around you
And that makes all the pain in life worthwhileI'll just write these songs forever and someday we'll be together
But until my dream comes true you got me and I got you. I got youSo I'll write these songs I'll write them all for you
Until you realize that you're my dream come true
Make you understand, hope that you feel it too
You should know by now that you're my dream come true
So I'll write these songs I'll write them all for you
Until you realize that you're my dream come true
Make you understand, hope that you feel it too
You should know by now that you're my dream come trueI'll just write these songs forever and someday we'll be together
But until my dream comes true you got me and you got me
I'll just write these songs forever and someday we'll be together
But until my dream comes true you got me and I got you. I got you
(what makes the beating in my chest stay strong) I got you
(you know you got it going ah-ah-on) I got you
(oh no oh no) I got you
