

Then Came You

Brett James

So many years I sat in the shadows
Only flickering embers around me
Believing the darkness would never end
Music - would never surround me again
and beauty would never astound me again...

Then came you
Then came you
Like an Angel smiling just the way you do...

Then came you...

So many years I lived in the shadows
Only flickering memories inside me
Believing the sadness would never end
The stars would never shine again
and love would never be mine again...

Then came you
Then came you
Like an Angel laughing just the way you do...
Then came - You stepped out from the sunlight
Startled my wounded heart
Then I started to feel again
That's when I started to heal and then
The idea of love became real again
Only when...

You swept into the shadows
Stepped into my wounded heart
That's when I started to feel again
I finally started to heal and then
Suddenly love - became real again
Only when

Then came you
Then came you
Like an Angel dancing just the way you do
Then came you

Then came you
Like a miracle that's too good to be true
Then came you...
