

Ice Cream Girl (featuring Wyclef Jean)

Sean Kingston

Ice cream girl[Chorus]
Give me a ice cream
Girl for the weekend
Kind of girl she built for any season
For the winter, for the fall
Even in the summer, time is no fall
You wanna a ice cream
Girl for the weekend
A pocket full of dough you wanna blow on the weekend
Young fresh and clean, you know what I mean
Everybody knows the female that loves the ice creamMy rum raisin, she drunk in the club
But said she knowin that, she always boostin'
She got a man, he's always cheating
And her daddy left her when she was 18Ride here ride her, she the life of the party
She's in that of the limousine, look like somethin' from a magazine
She's such a beauty queen, got me spending all my cream[Chorus]Once upon a time, let's go back to the scene
She was a prom queen, 'n you were the prom king
Pinky swear that you would never separate
'Cause you was drafted for the NBA
I used to worry about your best friend
I don't trust nobody named frosty the snowman
Frosty oh where you at?
Now ice cream man, is up in like thatHe reminisced of the limousine
Looked like somethin' from a magazine
She such a beauty queen
Had him spending all his creamGive me an ice cream man for the weekend
Body toned up ready for the beach and
Young fresh and clean, you know what I mean
Everybody knows the feen that loves the ice cream
You wanna a ice cream
Girl for the weekend
A pocket full of dough you wanna blow on the weekend
Young fresh and clean, you know what I mean
Everybody knows the female that loves the ice creamGive me an ice cream man for the weekend
Body toned up ready for the beach and
Young fresh and clean, you know what I mean
Everybody knows the feen that loves the ice cream
You wanna a ice cream
Girl for the weekend

A pocket full of dough you wanna blow on the weekend
Young fresh and clean, you know what I mean
Everybody knows the female that loves the ice cream
For the love of the ice cream
Ice cream girl Give me a ice cream
Girl for the weekend
Kind of girl she built for any season
For the winter, for the fall
Even in the summer, time is no fall
