

Breathe

Stereo Fuse

So you found your way to the inside
And you think you found a better life
Then all the money's gone
And then you all die young and then you fade away You gotta learn how to breathe, you're just 18
You gotta learn how to bleed, you're just 18
You got a life now to lead, you're just 18
You gotta learn how to breathe, you're just 18
You got to slow it down, you got to slow it down now So you think you've found you a new high
Now everything is just a blue sky
Can you turn it around
Before it all falls down and you just fade away? You gotta learn how to breathe, you're just 18
You gotta learn how to bleed, you're just 18
You got a life now to lead, you're just 18
You gotta learn how to breathe, you're just 18
And the sun will shine again tomorrow So you found your way to the inside
And you didn't have a good time
Can you turn it around
Before it all falls down and you just fade away? You gotta learn how to breathe, you're just 18
You gotta learn how to bleed, you're just 18
You got a life now to lead, you're just 18
You gotta learn how to breathe, you're just 18
You got to slow it down, you got to slow it down now
