

Together (feat. Newtimers) [Extended Mix]

Cazzette

If I'm gonna stay here for the night
Would you let me stay until the morning?
Wake up by your side and love you right againIf I'm gonna stay here for the night
Would you let me stay until the morning?
Crawl under your skin and love you right againI want to take it slow with you, my darling
I'm trying, but you get me excited
It's magic
With you, I lose control
It's you, my darling
Can't stop it, what I want in a lady
You got itIf I'm gonna stay here for the night
Would you let me stay until the morning?
Wake up by your side and love you right againIf I'm gonna stay here for the night
Would you let me stay until the morning?
Crawl under your skin and love you right againIf I'm gonna stay here for the night (for the night)
Would you let me stay until the morning? (Morning)
Wake up by your side and love you right again
Wake up by your side and love you right againIf I'm gonna stay here for the night
Would you let me stay until the morning? (Morning)
Crawl under your skin and love you right again
Wake up by your side and love you rightIf I'm gonna stay here for the night
Would you let me stay until the morning?
Wake up by your side and love you right again
(Wake up by your side and love you right right right right)
